

# Práctica SQL 12c

## 1. Distinct

- Visualizar las ciudades donde hay departamentos, de la tabla locations. No deben salir repetidos
- Visualizar los distintos tipos de JOB\_ID por departamento de la tabla Employees.

## SOLUCIONES

- Visualizar las ciudades donde hay departamentos, de la tabla locations. No deben salir repetidos

```
SELECT DISTINCT CITY FROM LOCATIONS;
```

```
CITY
```

```
-----
```

```
Beijing
```

```
Bern
```

```
Bombay
```

```
Geneva
```

```
Hiroshima
```

```
London
```

```
Mexico City
```

```
Munich
```

```
Oxford
```

```
Roma
```

```
Sao Paulo
```

```
-----
```

```
Seattle
```

- Visualizar los distintos tipos de JOB\_ID por departamento de la tabla Employees.

```
SELECT DISTINCT DEPARTMENT_ID,JOB_ID FROM EMPLOYEES;
```

```
DEPARTMENT_ID JOB_ID
```

```
-----
```

```
110 AC_ACCOUNT
```

```
90 AD_VP
```

```
50 ST_CLERK
```

```
80 SA_REP
```

```
110 AC_MGR
```

```
50 ST_MAN
```

```
80 SA_MAN
```

```
50 SH_CLERK
```

```
20 MK_MAN
```

```
90 AD_PRES
```
